We are still on the front lines of the Abortion Issue in America....

Since the overturning of Roe v. Wade, we have seen a significant increase in the demand for abortion around the nation. We believe this is because of a general fear that there will be a national ban on abortion and the circulated lie that women's healthcare will be subpar if the nation does not provide for abortions.

Where NC Stands.

Our current legislature has worked hard to pass pro-life legislation and increase restrictions - health requirements and check-ups- to receive abortions and abortion pills but this portion of the legislation is currently being held up in the state courts which makes it unenforceable. This is a vital step in decreasing the number of abortions we see in our state and ensuring the health of the women who desire these procedures and deadly medications. This 'hold up' is an example of how our currently legislation is always at risk why your pro-life vote is essential.

As is, our current state legislation allows for the termination of pregnancy up to 12 weeks gestation*. This gestation period accounts for over 90% of abortions* that occur in our state. With the abortion pill accounting for over 67% of those abortions.*

This means North Carolina has become one of the top travel-to states to receive abortions, with over 15,000 women traveling to the state in 2023. Allowing North Carolina to have one of the highest abortion rates in the country at 14.4% per 100,000 women.*

Join us in the fight!

Your pro-life vote, prayer and monetary support allows us to be open and available to women who are considering the abortion pill and other harmful interventions for their pregnancy. Sharing hope, truth and education while also referring to live-saving services, helps these women feel loved and supported. This counteracts the lies and fear they hear so often.

We plan to see more women than ever seeking our help, services and support. Please consider joining us in this vital life saving work!
